

# USB A male - USB A female - active repeater cable

## Highlights:

- Extension up to 12 meters
- Unique lockable mechanic design
- Daisy chain 5 extender cables up to 60 meters

## Product information:

The BXD602 is an active USB extender cable, allowing extension of the distance between a computer and USB device(s) to 12 meters. The cable is constructed using high quality raw materials with high purity oxigen free copper and flexible PVC. One side is terminated using a male USB type A connector, while the other end is fitted with an active extender housed small plastic enclosure with a female USB type A connector. Both ends feature an unique lockable mechanic design which securely links the male and female ends. It comes in a fixed length of 12 meters and a maximum of 5 extender cables can be chained together, resulting in a maximum distance up to 60 meters. Multi-platform support (Windows & amp; Mac) and bus powered construction guarantees true plug & amp; play operation.
