

Product information:

A high quality and flexible double isolated low smoke halogen free loudspeaker cable. This kind of speaker cable is suitable for use in indoor and outdoor applications. Each conductor has a section of 0.75 mm² and is fitted with a highly flexible jacket made of Polyolefin. Both conductors are twisted with two cotton cords, which ensures the great strength and flexibility of the cable. The two wires, together with the cords, are packed with a plastic foil and a general Polyolefin jacket with an O.D. of 7 mm. These cables have been designed for connection of loudspeakers in fixed or mobile sound systems.
