

Product information:

The OTT15 is a fiber optic cable that is terminated with a Toslink connector on both ends and can be used for a large range of professional digital audio equipment devices. Connecting into two female sockets, this cable conveniently and effectively transmits digital audio data clearly without the interference you might receive from electrical cables. The OTT15 is compatible with all popular formats of optical audio transfer.

Components:

- CableType: ROP15 - Fiber Optic Cable

Product Features:

Application

AV & IT

Component details:

ROP15

Fiber Optic Cable

This cable is a cable only used as a production component for PROCAB pre-made cables and is not sold separately or in bulk. Consult the productsheet for detailed information.
